NOTES:

In addition to the designated CSAF mitigation activities listed, conservation practices that facilitate the management or the function of a CSAF mitigation activity but may not achieve the desired effects on their own (and may not have a quantifiable benefit) may be planned as applicable. Examples: Tree/Shrub Establishment (612) may need facilitating practices such as Tree/Shrub Site Preparation (490) or Access Control (472). Conservation Crop Rotation (328) may need facilitating practices such as Pest Management Conservation System (595), Cover Crops (340), or Irrigation Water Management (449). Waste Separation Facility may need facilitating practices such as Waste Transfer (634) or Roofs and Covers (367). Prescribed Grazing (528) may need facilitating practices such as Watering Facility (614), Stream Crossing (578), Fence (382), or Livestock Shelter Structure (576). Upland Wildlife Habitat Management (645) may need facilitating practices such as Brush Management (314), Herbaceous Weed Treatment (315), or Prescribed Grazing (528).

Activities highlighted have been added to the list in FY23.

*Noted activities are added to the list as "provisional." These practices, associated enhancements, and bundles are being added under the premise that they may provide benefits, and a quantification methodology will be evaluated during the fiscal year. Practices may be removed from the mitigation practice list in a subsequent fiscal year if quantification is not possible.

- [1] Unless otherwise noted, listed practices have quantifiable carbon sequestration and/or GHG reduction methodologies described in COMET-Planner (www.comet-planner.com). New practices will be added as science progresses and scientifically defensible quantification methodologies are identified to accompany existing and new NRCS conservation practice standards.
- [2] The included Conservation Practice Standard links provide national information. Please consult the NRCS office at your local USDA Service Center for any local and state level criteria. Visit farmers.gov/service-locator to find contact information for your local office.
- [3] Effective Oct 1, 2022, Land Reclamation, Currently Mined Land (544) was archived and has been removed from this mitigation list, the practice was combined into Land Reclamation, Abandoned Mined Land (543). See NHCP Notice 172 for more information.
- [4] Conservation Practice Standards Irrigation Water Management (449) and Pumping Plant (533) are not GHG mitigation practice standards. The only atmospheric-beneficial applications are with Enhancement Activities E533C, E533D, and E449B or when 449 is implemented as part of an alternated wetting and drying (AWD) system in rice fields.
