2023 Virtual Conservation District and PA Agency Ag Meeting
April 3 & 6, 2023

Jamboard Tutorial for Breakout Sessions

We will be using Google Jamboard to lead discussion and collect feedback during the breakout sessions.

What is Jamboard?

Jamboard is a digital whiteboard that lets you collaborate in real time using either the Jamboard device (a 55-inch digital whiteboard that works with G Suite services), web browser or mobile app.

- During the breakout sessions, facilitators will share a link to the Jamboard. Please click the link to open the Jamboard on your computer or mobile device.
- We will be using the sticky note feature to collect feedback to questions and prompt discussion. Below is a link to a short YouTube tutorial on Jamboard sticky notes.

  https://www.youtube.com/watch?v=jIfjG9ahvws

- Please do not delete sticky notes once they are posted. We will be summarizing the feedback on the Jamboard to share with everyone after the meeting.
- To toggle between questions, with the direction of the facilitator, please use the page button at the top center.
- Below is a screenshot of a Jamboard with the page toggle and sticky note functions highlighted.
